MMWD

Suggestion -

Desalination facility action plan

Step one - raise \$5 million for a working model board approved 2024 budget. This test run is to learn how desalination plant can provide water to Marin and tangible value to taxpayer. The \$5 million is working model and tool to educate taxpayer cost and why going forward to larger plant does work for everyone.

Step two - build a larger working facility with taxpayer, local government, state and federal funding.

Step three - a working desalination plant serving the public daily.

Any questions ask me.

Roy Benson
