

# Watershed Wildfire Incident Report

July 5, 2022

# Outline

- **Watershed Overview**
- **Wildfire Incident**
- **Wildfire Response**
- **Lessons Learned**
- **Enhancements**

After forest restoration treatment along Lakeview Fire Rd.

# Equipment Inventory

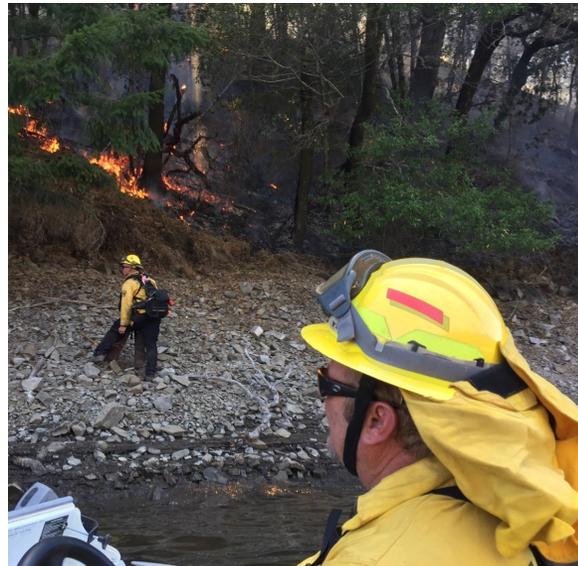

District's equipment supports initial attack, patrol and Marin County Fire's response.

## Rangers' Trucks:

- 2 – Type 6 (200 gal) & 1000 ft of hose
- 3 – Type 7 (100 gal) & 400 ft of hose

## District Equipment

- Type I Tactical Water Tender (2,200 gal)
- Type 3 Wildland Engine (500 gal)
- Boat with portable pumps
- Dozer (Fire Rated)
- Over 5,000 ft of wildland fire hose

# Watershed Staff

## Wildland Firefighter 2 or Higher Certifications

- Rangers
  - 6 Fulltime
    - 1 Ranger position currently in recruitment
  - 1 Seasonal
- Watershed Maintenance
  - 7 Fulltime
- Natural Resources
  - 2 Fulltime
- 1 Contract Sherriff  
(not a certified wildland fire fighter)

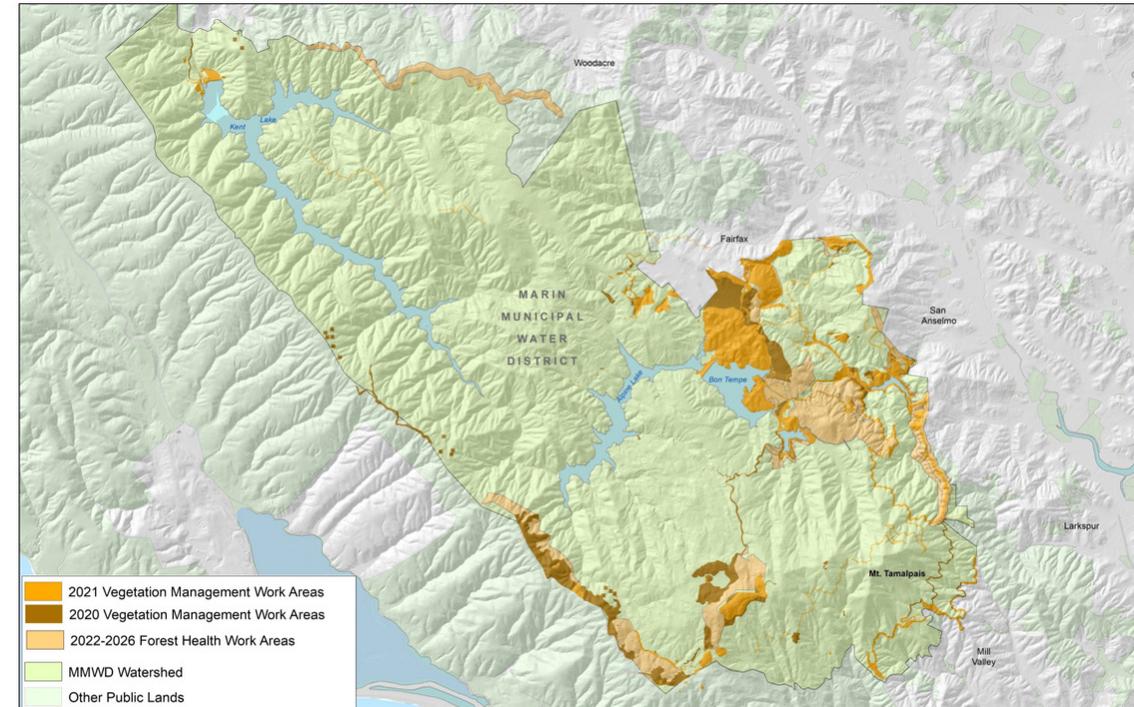

In-house Training and Annual Qualifications

# Watershed Vegetation Management in FY 2022

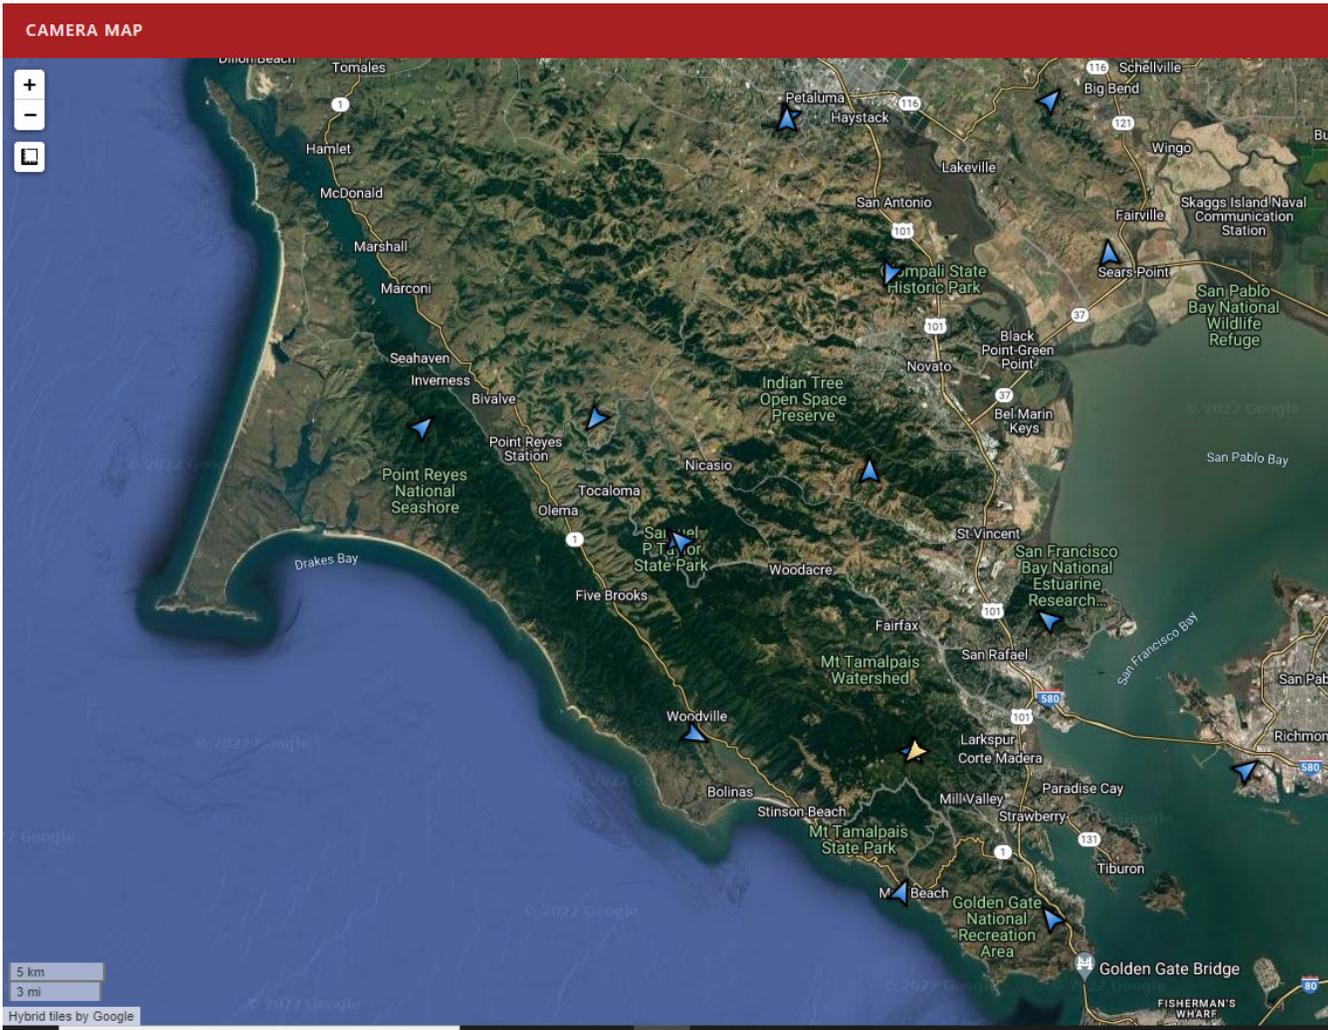

Watershed forest restoration and vegetation management work completed to date:

- 282 acres of Fuelbreak maintenance work completed to date
- 146 acres of forest restoration and fuel reduction work completed
- 524 acres of broom management work completed
- 218 acres of priority weed management work completed to date

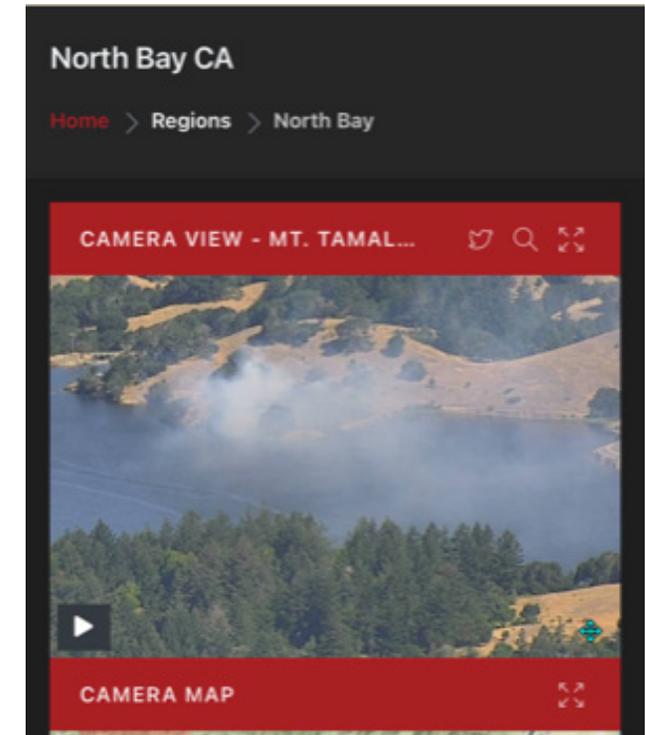

# Alert Wildfire Camera Network

# Lake Fire Response

- Rangers notified by visitor of smoke (**9:45 am**)
- Rangers and Watershed Maintenance responded with Type III Engine and hiked in to site with hand tools
- Rangers connected with injured watershed visitor for medical aid and medical transport
- Rangers and Watershed Maintenance mobilized boat and portable water pumps to Bon Tempe Lake
- Watershed staff closed Sky Oaks Watershed entrance and directed fire responders
- County Fire Mobilized 67 firefighters
- Watershed staff evacuated school group to Sky Oaks Ranger Station
- Air support arrived and was quickly called off
- Fire completely contained (**10:43 am**) and mop-up completed by (**Noon**)

# West Peak Fire Response 2021

- Ignition source was visitor car fire
- Throckmorton Fire first on scene
- Rangers Type 7 engine response
- Watershed Maintenance with Water Tender Type I response
- Air attack utilized two aircraft to control spread
- Previously treated defensible space zone influenced behavior of fire and slowed spread towards communication infrastructure
- Water resupply occurred via spring feed tank at Rock Springs. No fire hydrants above Throckmorton
- Visitors held at East Peak until the fire was contained

# Lessons Learned

- Hard closure of Sky Oaks entrance to reduce community members entering the active fire area.
- Pro-active forest restoration and fuel reduction work provides tactical advantage for first responders and influences fire behavior.
- Rangers are critical for initial attack, but have other roles once County Fire takes over incident command.
- Watershed closures and evacuations clears the area for first responders.
- Water supply is critical to response either from hydrants, water tenders, lakes/streams or spring feed tanks.

# Operational Enhancements

- Increase acreage for BFFIP implementation
- Higher pressure (300PSI) mobile water pumps for lake response
- Water tender (model year 2005) could be upgraded and could include a potable water tank
- Kiosk signage regarding emergency response and evacuation
- Enhance watershed spring tanks (8 sites of which 2 require repairs) and/or fire hydrants
- Ranger full time staff and/or seasonal kiosk staff
- Investigate options for cell phone boosters where possible
